

UNDERSTAND WHAT'S IN YOUR WATER

What's in your water impacts your home, your health, and your daily life

WATER IS USED THROUGHOUT YOUR HOME

Showers

Kitchen

Laundry

Appliances

Every tap uses the same water supply

MELBOURNE WATER SUPPLY

Melbourne water is treated for safety, then travels through ageing infrastructure before reaching your home — where chlorine, sediment, and minerals can still be present.

WHAT'S IN YOUR WATER

Chlorine disinfectants

Sediment (rust, debris)

Hard minerals (scale buildup)

WHY IT MATTERS

- Dry skin & irritation
- Dry / brittle hair
- Chlorine smell
- Buildup on taps & glass

Key Statement

Whole home filtration treats water before it enters your home

FILTRATION STAGES

STAGE 1

Sediment Reduction

- Removes rust & debris
- Protects plumbing

STAGE 2

Chlorine Reduction

- Improves taste
- Gentler on skin & hair

STAGE 3

Scale Reduction

- Reduces buildup
- Protects appliances

SYSTEM FEATURES

- ✓ Australian Designed
